

**UPDATE: HOUSE VOTES TODAY**

# Pass the Recovery Plan

**CALL YOUR MEMBER OF CONGRESS NOW**

## **PASS THE RECOVERY PLAN CALL YOUR REPRESENTATIVE NOW**

In the aftermath of Monday's failed vote, it has become very clear that telephone calls from local constituents matter greatly. Many Members of Congress could recite off the top of their heads how many constituent calls they received in favor or in opposition to the rescue package. We need to have our voices heard. We urgently need you, **and your employees**, to make calls **today** to the House of Representatives and ask them to pass The Emergency Economic Stabilization Act of 2008 to bring stability to our economy and increase credit availability for the benefit of every American citizen. **The House votes today.**

To find your Representative's phone number, please visit [www.sifma.org](http://www.sifma.org) and click on "**Pass the Recovery Plan Now**". From there, it is as easy as entering your zip code -- the name of your Representative and their phone number will appear. If you experience any problems, you may also go to [www.congress.org](http://www.congress.org) and look in the upper right hand side of the screen.

Please let your Representative know the following:

- **Vote YES on the recovery plan.** We believe this legislation is critically important and should be enacted into law at the earliest possible time in order restore market stability and increase credit availability for businesses and consumers across the country.
- Every day, working Americans rely on healthy credit markets for home loans, auto loans, student loans and other types of financing. **These credit markets help support small businesses as well, which need cash flow to meet their payrolls.** The economy has slowed and unemployment is on the rise. Voting **YES** will help save jobs.
- **Main Street America needs this recovery plan.**
- **Vote in FAVOR of the recovery plan.**

Thank you for your immediate action contacting Congress.
